ABSTRACT

25X1

This report locates and describes eight television/microwave facilities generally along a line extending east-northeast [REDACTED]

25X1

INTRODUCTION

Collateral reports have indicated the existence of microwave relay lines [REDACTED] and involving at least 12 TV/microwave facilities. A search on [REDACTED] photography revealed the presence of a TV/microwave line [REDACTED] to Kinel, east-northeast to Otradnyy, and northeast to Pokhvistnevo and Buguruslan (Figure 1). Also revealed was another TV/microwave line extending from Slak, north to Davlekanovo, and terminating at Chishmy (Figure 1). No evidence was found of a relay line between Buguruslan and Slak or between Chishmy and Ufa.

An overall result of the search was identification of TV/microwave facilities [REDACTED]. These eight facilities are described in the following section of this report. The four areas where no facilities were found are Podbelskaya (53-46N 51-45E), Belebej (54-07N 54-07E), Abdulino (53-41N 53-40E), and Ufa (54-43N 55-55E).

[REDACTED] photographic coverage of the entire search area was available for the search. The photography is of fair to good interpretability. [REDACTED]

are the only communications or electronics facilities observed in the search area. Orientation of the microwave elements cannot be determined from the available photography, and at all facilities [REDACTED] the small scale of the photography precludes further identification of microwave equipment by size and type. Locations of the eight facilities are numbered [REDACTED] and the following descriptions are in the same order.
